IT114-450-M2024 - [IT114] Module 1 Getting Started

## Submissions:

Submission Selection

1 Submission [active] 5/27/2024 12:06:48 AM

## Instructions

^ COLLAPSE ^

Overview Video: <https://youtu.be/LQwyAhmNzoQ>

1. Create a repository on github, use the format `ucid-course-section` as the repository name.
2. Make sure it's set to private
3. Go to Settings -> Manage Access -> Invite Collaborator -> Search for my ID **MattToegel** and send an invite; if your section has a grader do the same for their github username (refer to course announcements)
  1. **Note:** Once in a while the invite doesn't get created correctly and you'll need to resend it, keep an eye on the acceptance of the invite since this is required for further HW validations. A comment will be left on Canvas for the submission if the invite is missing at the time of grading).
4. From the terminal / command line create a new branch called **M1-GettingStarted**
5. Create a README.md file and add it to the branch
6. Fill in some basic details:
  1. Course/Section
  2. Your name (first is fine)
  3. Brief info about yourself you'd like to share
7. Hint after creating the file
  1. `git add README.md`
  2. `git commit -m "my readme file"`
  3. `git push origin M1-GettingStarted`
  4. Create a pull request from this branch (via github.com)
  5. Don't merge/close the pull request yet
8. Fill in the below deliverables.
9. Once finished, ensure it's saved and click the "Export" button.
10. Move the generated PDF into your local repository folder at any location of your choosing.

## 11. Do the following commands

1. `git add .` (this will add all changes)
2. `git commit -m "adding output file"`
3. `git push origin M1-GettingStarted`

## 12. Go back to github and merge the pull request that was opened

## 13. Go to Canvas and upload the same PDF that you just downloaded and pushed to GitHub

**Note:** Having the submission saved and active keeps it eligible for grading.

Branch name: M1-GettingStarted

Tasks: 4 Points: 10.00

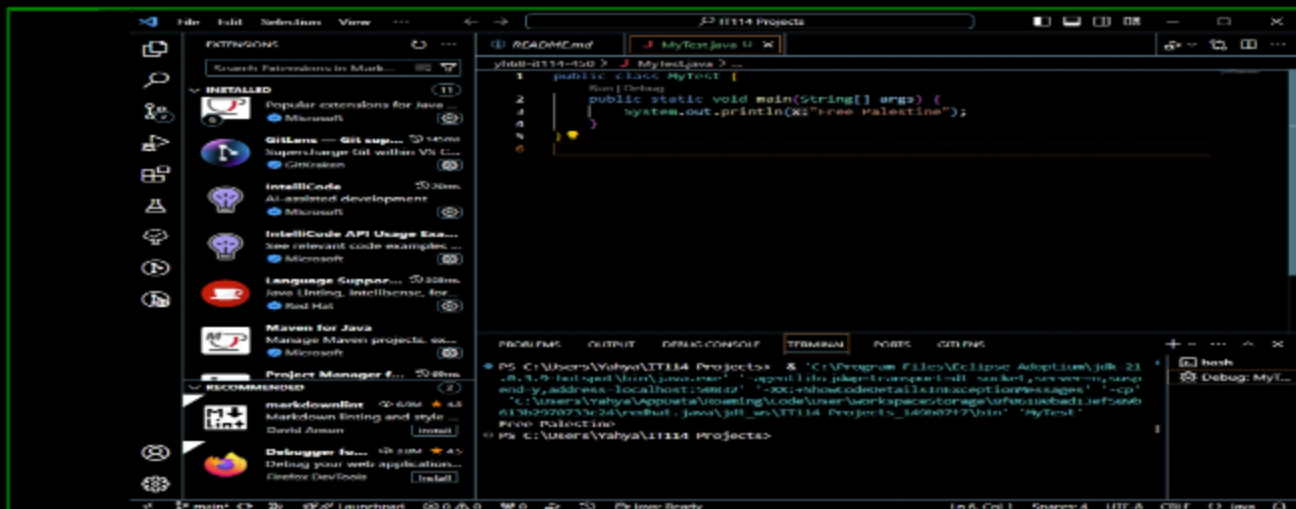

IDE Setup Evidence (2 pts.)

^COLLAPSE ^

Task #1 - Points: 1

Text: Required Extensions

### #1) Show the Java Extension Installed and Enabled

Caption (required) ✓

Describe/highlight what's being shown

I'm assuming I am to upload a screen shot of vscode...This prompt is a bit vague, pardon me if I'm slow.

### #2) Show WakaTime Installed and Enabled (include bottom toolbar with the clock icon)

**Caption (required)** ✓

*Describe/highlight what's being shown*

There is a screenshot of wakatime in vs code (bottom toolbar clock icon). And a screenshot of the wakatime dashboard.

Reflection (6 pts.)

^COLLAPSE ^

**Task #1 - Points: 1**

**Text:** Talk about what you learned during this module, anything interesting, new, etc.

**Details:**

Should be at least a few sentences for full credit

Response:

I learned a little about github, gitbash, vscode, and terminal commands in this module. I think this is super interesting because certain things didn't make a lot of sense to me before when I would use code from github, but I have learned a few things just from this module that is helping me piece some parts together.

**Task #2 - Points: 1**

**Text:** Did you have any issues? If so, how did you resolve them? If no issues, just type "no issues"

Response:

I had a few issues initially. However, when I realized I don't know everything and turned on professor Toegel's tutorial videos, I found that he covered all of the issues I had.

Pull Request (2 pts.)

^COLLAPSE ^

Task #1 - Points: 1

Text: Add the pull request link here (it should end in /pull/#)

URL #1

<https://github.com/FreePalestine7/yh68-it114-450/pull/2>
